

Category	Description	Reviewers Comment	Action taken by reviewed group
Build	Could you clone from Git and build using the README file?	The README is straightforward and easy to follow. I was able to get the project working.	
Legibility	Was the flow sane and were variable names and methods easy to follow? Does the code adhere to general guidelines and code style?	Code is clean and comments are used when necessary. Variable names and methods are simple and clear.	
Implementation	is it shorter/easier/faster/cleaner/safer to write functionally equivalent code? Do you see useful abstractions?	I don't see anything that I would do differently.	
Maintainability	Are there unit tests? Should there be? Are the test covering interesting cases? Are they readable?	There aren't any unit tests, but trial and error is used instead. Maybe try user testing?	
Requirements	Does the code fulfill the requirements?	Most of the requirements are fulfilled. Issues are mainly addressed during the walkthrough.	
Other	Are there other things that stand out that can be improved?
